Akash Malbari

“My time at RAIT has had a great influence on my career and helped me succeed. The most valuable experiences during my time at RAIT were because of choosing Computer Engineering and participating in the technical committee of the Computer Society of India. The mix of these helped me gain the much-needed confidence to explore various career options in the years later. This not only helped me excel in my master's degree but also helped me entering my professional positions at Nomura and Oracle.

-Akash Malbari (CS Engineering 2013)
Application Developer at Oracle, United States, with a *master's degree from the Pennsylvania State University in Information Sciences*

Testimonials

Manali Killedar (IT Engineering 2015)
Senior Associate at PwC, United States

“My 4 years at RAIT were nothing less than life-changing. RAIT gave a platform to grow and learn to every kind of person. From studies to extra-curricular activities, there was a platform for every person to learn with like-minded people. This culture truly prepared us for the real world, and we learnt to prioritize and discipline our lives.

(Manali went for further studies to the Carnegie Mellon University, USA)

RAIT Testimonial

I would describe RAIT in two words: holistic development. It has maintained a vibrant culture outside the classroom where one can explore ideas and projects with freedom. This culture of excellence and exploration makes sure that students venture out of their comfort zone and learn new things. In addition, The institute has eminent faculty and resources to make sure you build expertise in your field.

I will forever cherish the amazing experiences I had and the bonds I made during these four years, which were certainly the best years of my life!

RAIT Testimonial

NACHIKET MALPATHAK passed out in 2017 and is currently Area Sales Manager at Park Avenue Grooming (Raymonds group.) He completed his MBA from Jamnalal Bajaj Institute Of Management Studies.

Rajesh Jumani

The building blocks of my leadership skills, team management, negotiations, process adherence, out-of-the-box thinking and jugaad were all a result of organizing "Horizon".

RAIT hired the best faculty from all across the country who were always approachable and went the extra mile to help students. This was the culture built by the college management which cascaded all the way from the Principal to the office staff. The beautiful memories of RAIT are etched forever in my mind and if given a choice, I'd go back and repeat my four years of college again.

Rajesh R Jumani, 1990-94 batch, B.E. Electronics from RAIT.

(Senior Vice President with MPS Interactive Systems (Tata Interactive Systems) and been with the same organization for the past 23 years. He went on to do a management degree and also did a super specialization from Harvard Business School)

Testimonial of Sanvid Patil

I graduated from RAIT in 2015 with first class in electronics engineering. Currently I work for Johnson and Johnson as a Strategic Design Consultant. RAIT has been critical for my career. The faculty members in the college were very kind, supportive and aware about career options after undergraduate studies. Their creativity and passion inspired me to follow my heart. I have become more confident due to such a nurturing and friendly environment. The most important thing I learned at RAIT was the ability to think critically and holistically. To this day those basics from subjects like communications and systems help me in my professional career.

SANVID PATIL

(Masters Degree in Industrial Design

Arizona State University

Currently working as Strategic Design Consultant, Johnson and Johnson, USA)

Sreejith Menon's testimonial

RAIT has best in class faculty and every professor I have had over 4 years were experts in their domains. The faculty at RAIT are very approachable and are great mentors. They have helped me with my first ever working software to coaching me for my placements in my final year. The thing that made my experience at RAIT unique was that the professors as well as the management placed equal emphasis on academics as well as extra-curricular activities. At RAIT, I believe there are things for everyone to do.. and it has taught me an array of things ranging from leadership to being organized and diligent.

OR

Interested in tech and want to learn more, you could join a tech club and learn while having fun. Are you good at art? Join our art/drama/singing/dancing committees. Do you want to explore the marketing side of things? Join a sponsorship committee and go pitch. Are you interested in a social cause and want to contribute more? We have a social wing at RAIT that you could join. RAIT has resources to help you succeed in your career and your life.

(Sreejith Menon graduated in 2013 from RAIT with a bachelor's degree in Computer Engineering. worked for J. P. Morgan for 2 years after which he pursued his master's degree in computer science from University of Illinois at Chicago. He currently works as an Applied Machine Learning Engineer with Bloomberg LP.)
