

Feedback Mechanism

School of Medicine collects feedback from students on curricular and other aspects of teaching learning, infrastructure etc. The feedback is collected in both formats online as well offline. For offline feedback collection feedback forms will be distributed to the students on the last day of Final University examination for every academic year. The information allows us to analyse what our strengths are and to identify areas that need improvement. The online feedback a URL link is shared with students and feedback is taken on Google forms. The feedback is then analysed and action is taken on the basis of feedback.

Action taken report for the feedback: Based on the feedback from the student community the necessary actions were carried out.

Teacher feedback is also collected and this feedback generated by the teaching community will be discussed and satisfactory action will be taken for that particular point.

Alumni feedback and action taken report: Alumni are our strengths and they always guide us by providing feedback for improving our quality. Hence Alumni feedback is also taken, analysed and corrective actions will be taken and implemented for the next session.

Feedback works well for those who have a foundational understanding of the core expectations and principles that guide their work and based on the feedback from stakeholders the institute take action.

Feedback links are as follows:

Students
