FELLOWSHIP IN FORENSIC ODONTOLOGY

DR. ASHITH ACHARYA - PROGRAM DIRECTOR AND CHIEF MENTOR

FELLOWSHIP PROGRAMS OF

D Y PATIL UNIVERSITY

Navi Mumbai
Forensic Dentistry or Odontology is the proper handling, examination and evaluation of dental evidence, which will be then presented in the interest of justice.

In modern days many researchers have shown various contributions in the field of Forensic Odontology that have brought remarkable changes. However, within India, the routine use of Forensic Dentistry is not yet a reality.

Our institution provides an apt avenue to receive further educational opportunities for dental professionals and students interested in dental forensics or mass fatality response teams via which, they could apply their knowledge in forensics.

The prime objective of this course is to train a candidate so as to ensure higher competence in both general and special area of interest and prepare him/her for a career in the specialty. Also, this course will help medico-legal investigation in both civil and criminal cases.

Dr. Ashith Acharya needs no introduction. He heads India's first exclusive department of Forensic Odontology. Apart from serving as a consultant to the Police and Other Govt. Agencies, he guides postgraduate research and conducts workshops on diverse aspects of the subject. A critic for international dental and forensic journals, he is a keen researcher with 37 published articles – 30 of which have found a feature in the International Forensic and dental magazines. Over the years, he has proved to be a great mentor for us. So, if you want to make a career in Forensic Dentistry, look no further.

Allow us to introduce ‘Fellowship in Forensic Odontology’. Immaculately designed, this 1-year program is compiled in a modular format to boost your dental skills in the right direction.
